CONTENTS

A unified a posteriori error estimate of local discontinuous Galerkin approximations for reactive transport problems
   by Jiming Yang ... 759

Minimum implicit degree condition restricted to claws for Hamiltonian cycles
   by Xing Huang ... 773

Quantum stochastic calculus and quantum Gaussian processes
   by K. R. Parthasarathy ... 781

A class of constacyclic codes over a finite field-II
   by Madhu Raka ... 809

Breakdown of classical solutions to Cauchy problem for inhomogeneous quasilinear hyperbolic systems
   by Yumei Xu and Libin Wang ... 827

Normality and sharing functions
   by Gopal Datt and Sanjay Kumar ... 853

A survey on Zariski cancellation problem
   by Neena Gupta ... 865

On support properties of functions and their Jacobi transform
   by Néjib Ben Salem and Saifallah Ghobber ... 879

The Gauss-Bonnet theorem
   by M. S. Raghunathan ... 893

The Levitin-Polyak well-posedness by perturbations for systems of general variational inclusion and disclusion problems
